

New Print and Email Icon

You will soon be able to simultaneously print and email a document at the push of a button.

Coming later this month, Westlaw Canada is introducing a new Print/Email icon in its delivery menu. Clicking on this icon will allow you to define your print parameters and your email destination in one menu.

To accommodate the new icon and streamline their appearance, print icons will display as graphics only. Hold your mouse pointer over any icon to view hover text explaining each function.
